China Gate Restaurant

The restaurant is designed with a light touch of Chinese culture, taking into account the standards used in restaurants. The restaurant has a waiting area and an upper floor with a distinctive shape and seating areas in various shapes and distribution. In addition, aesthetic elements decorate some walls of the restaurant, such as Chinese antiques, welcoming phrases, and others.

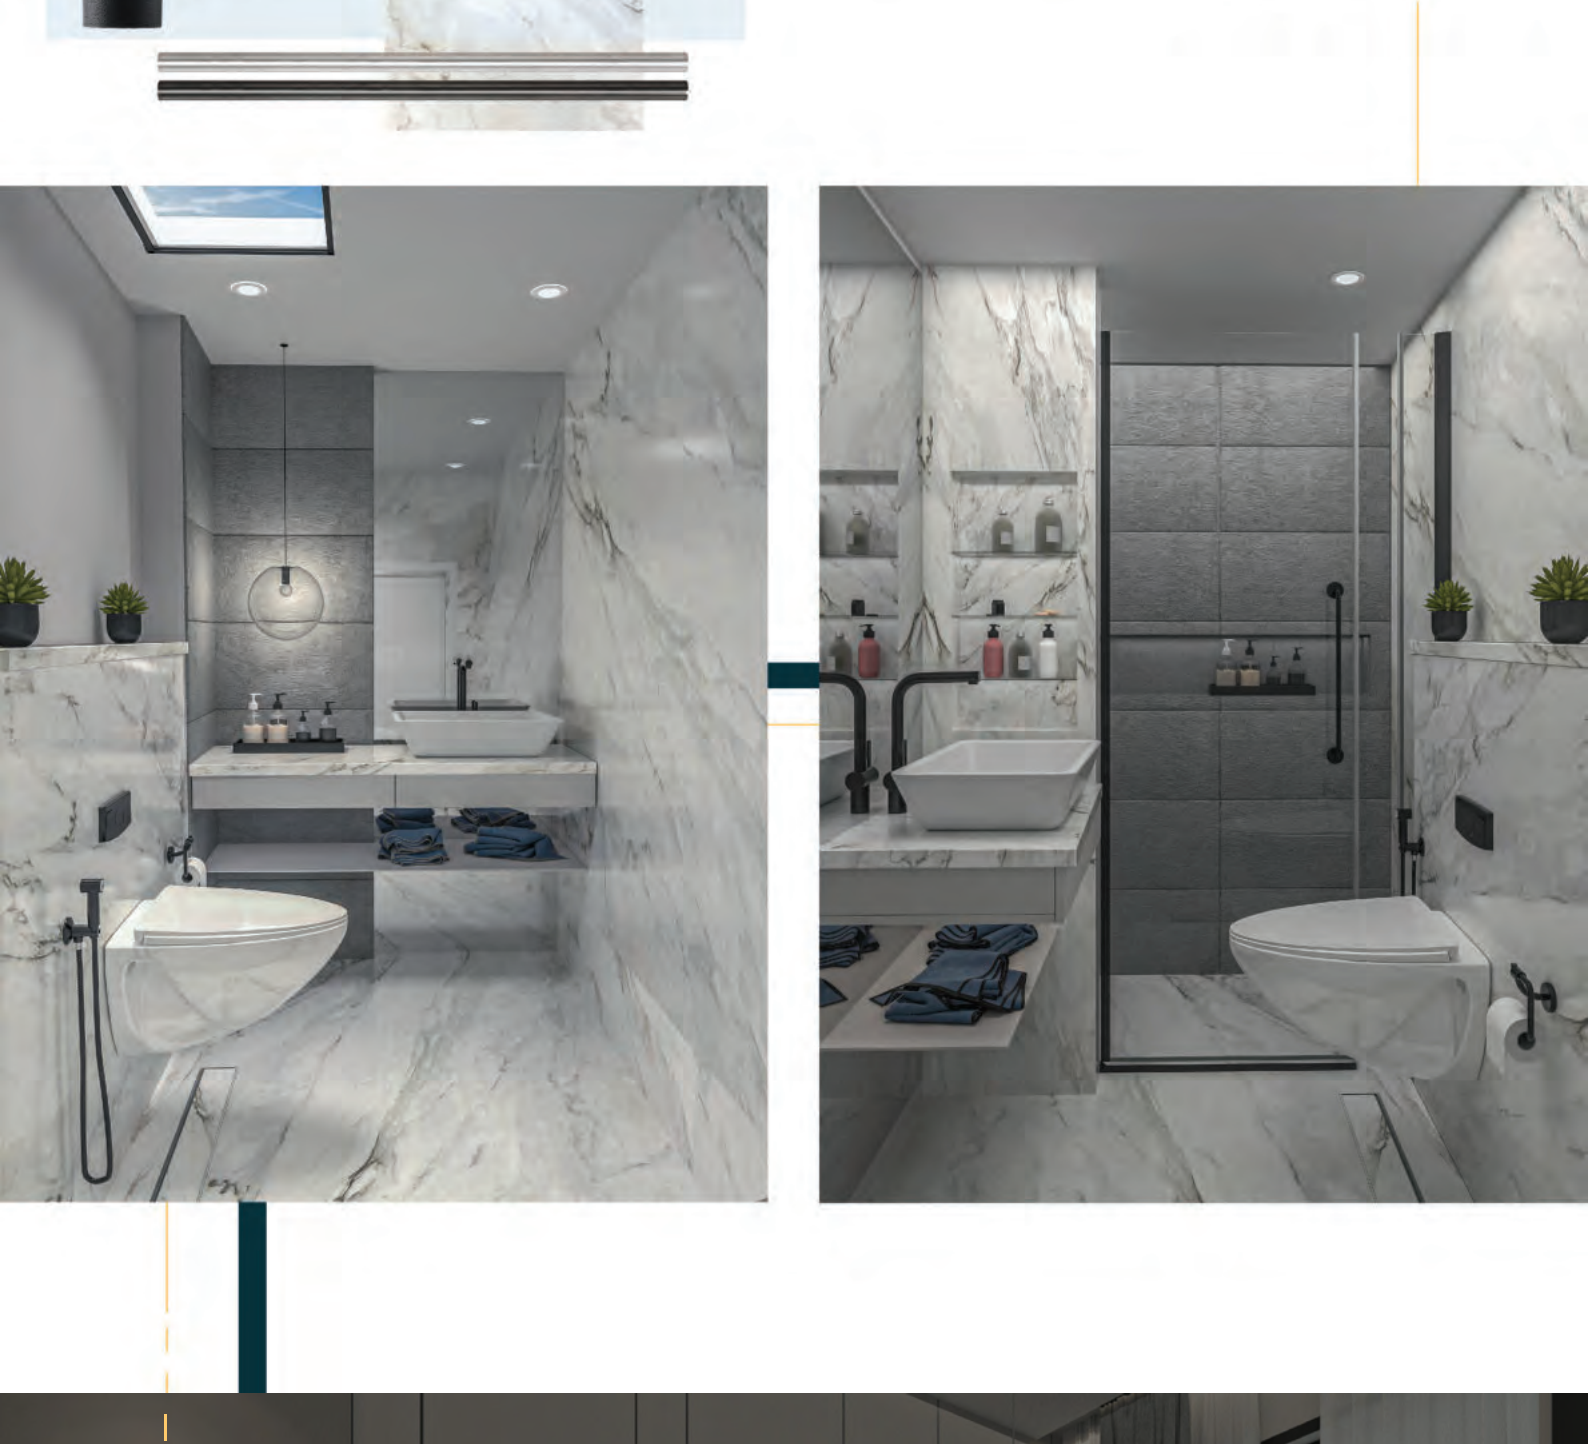

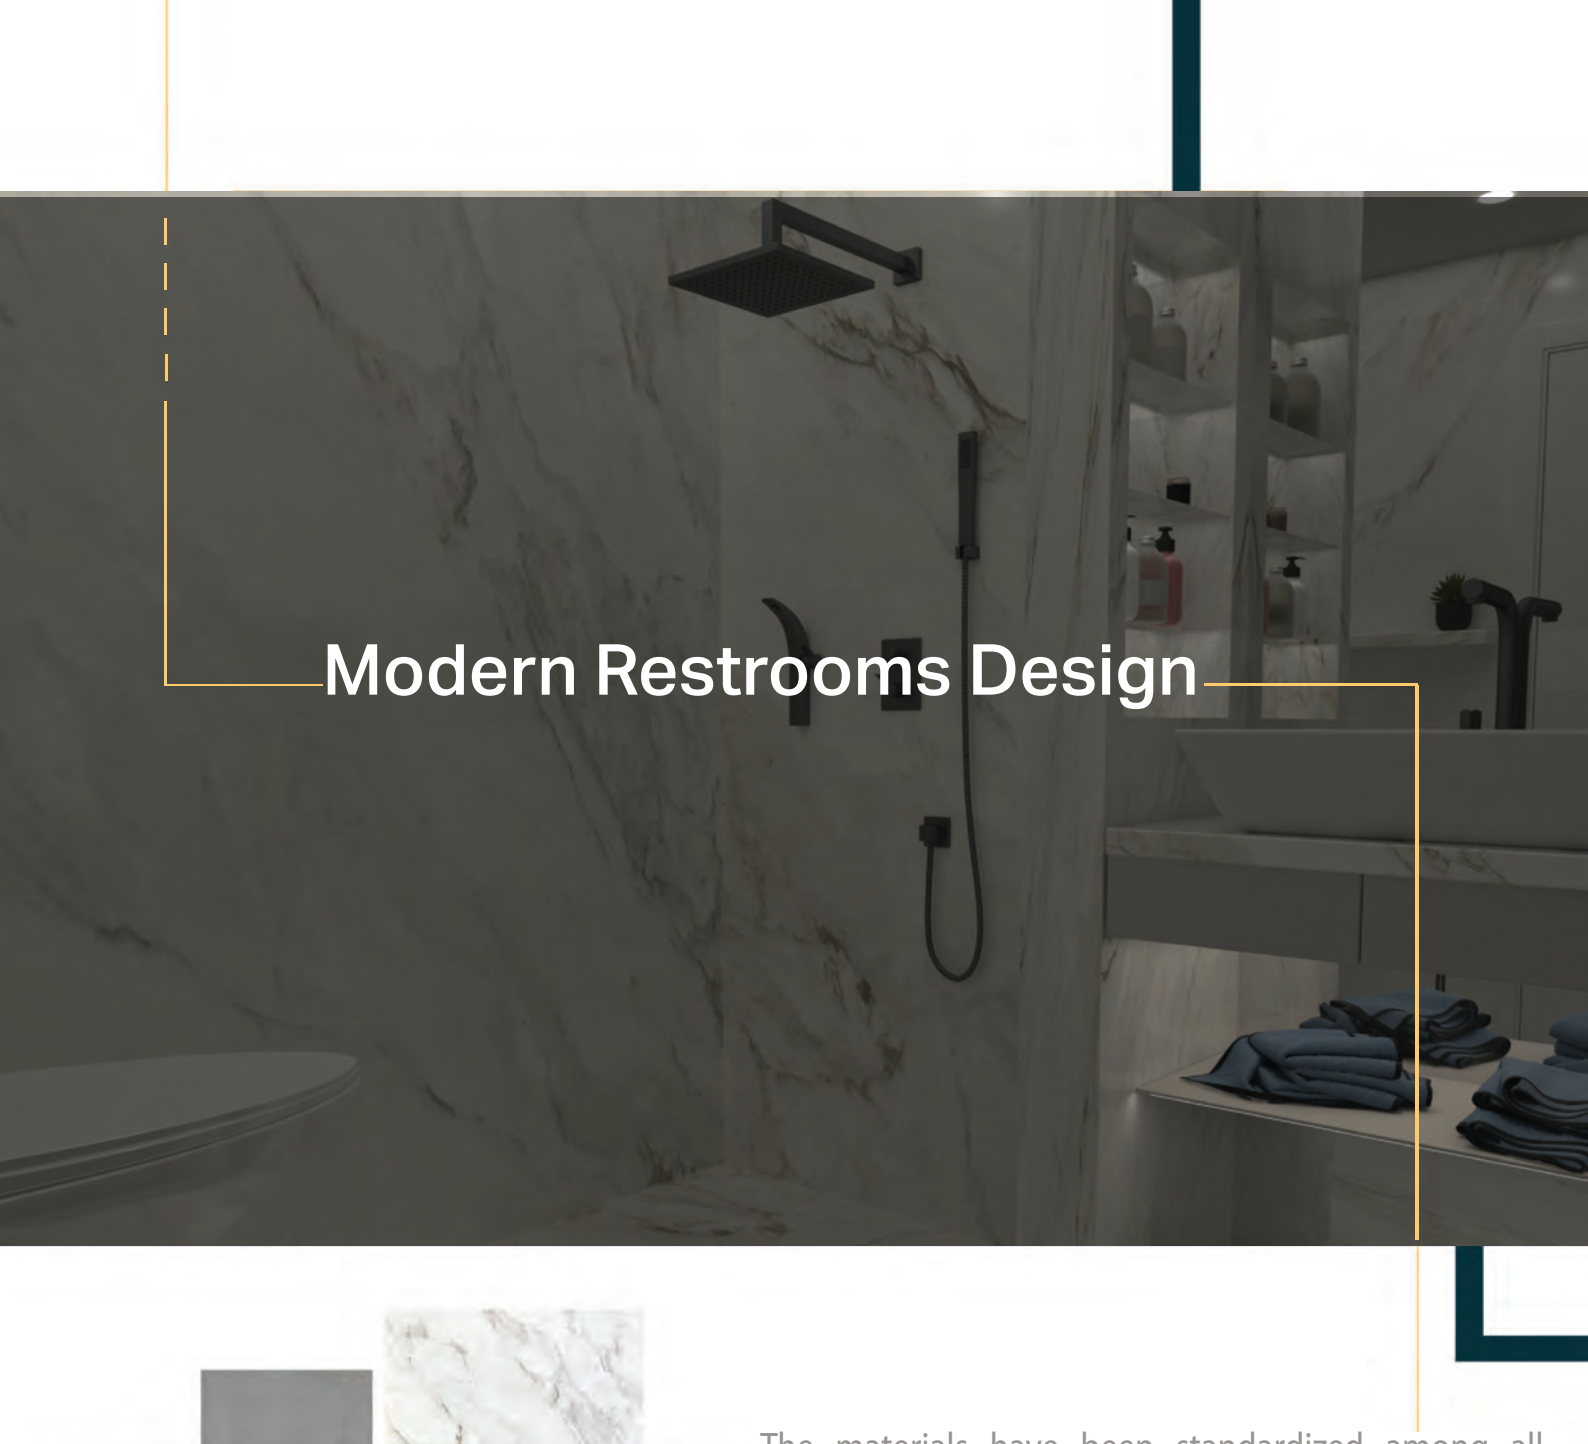

Diwaniya Design

The design of Al-Diwaniyah is focused on achieving recreation, pleasure and entertainment areas with a luxurious and simple style. Introducing entertainment facilities such as billiards (pool), a coffee corner, a changing seating area with a large screen and a home theater, in addition to the ability for users to play card and board games in the same seating area. It is possible as well to create any other means of entertainment.

Modern Exterior Design

Modern Restrooms Design

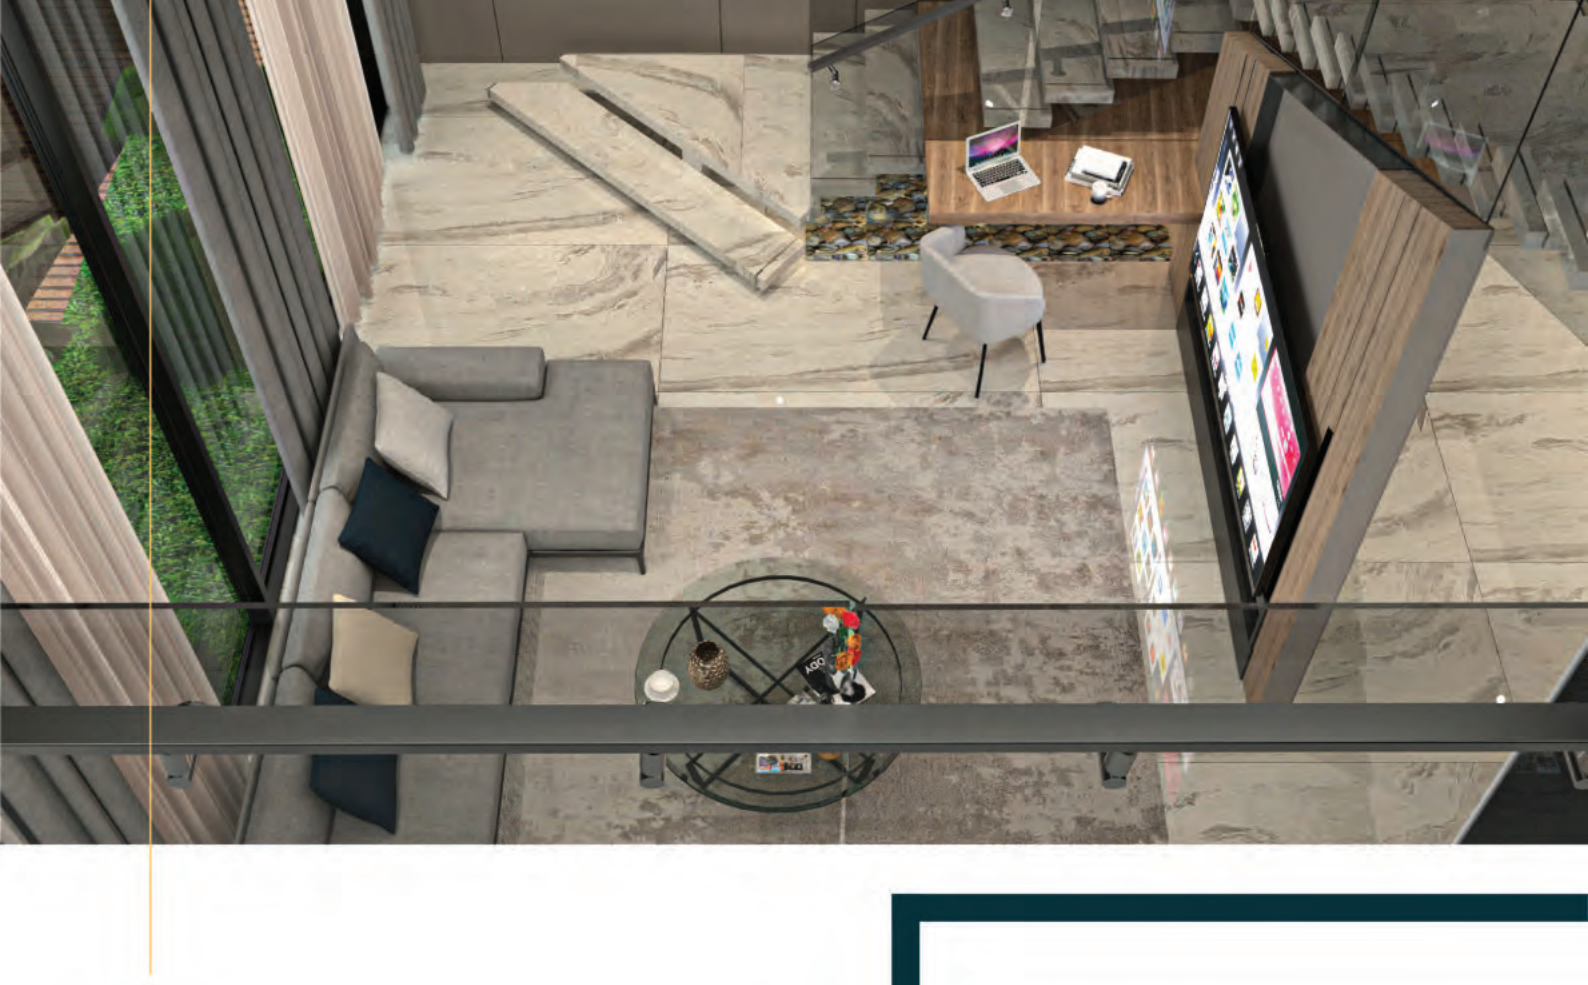

The materials have been standardized among all restrooms in one house despite the difference in its functional distribution. This was a saving plan on cost of purchased materials while achieving uniformity and diversity at the same time.

Modern Villa Design

Villa Design

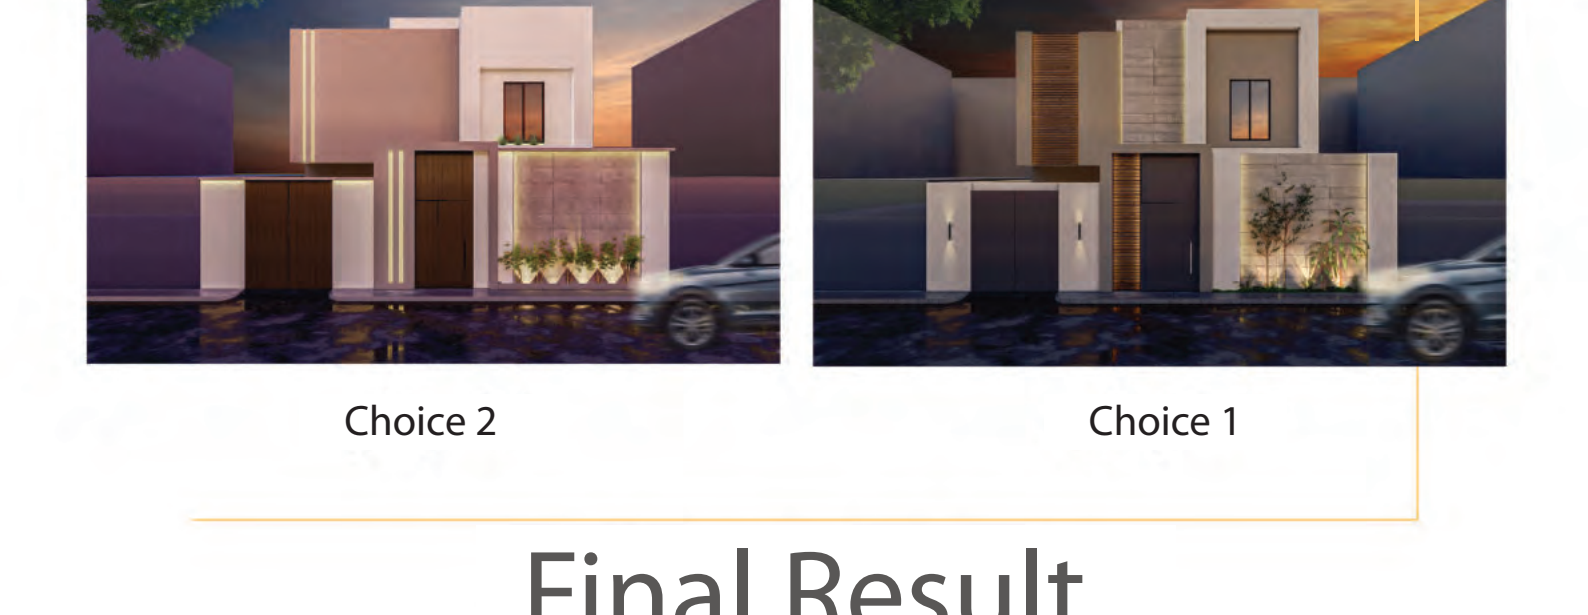

The design has been worked out with a functional and aesthetic distribution that suits the requirements of the client and his family to meet the highest standards of comfort and required privacy.

Simple Exterior Design (Different Choices)

Final Result

Modern Outdoor Areas Design

Practical design for outdoor spaces in a chalet With multiple functions.

Various Seating Areas

Swimming Pools For Different Ages

Parking

BBQ Area

Relaxing Area

Sunbathing Area

Shower Area
